

Data Express DE275 SAS/SATA Install Guide

Removable SAS/SATA Drive Enclosure

The DE275 SAS/SATA enclosure is designed to incorporate the rugged security of the DE200 with the low profile size of the DE75. The DE275 includes two thumb screws for even greater stability. The 1" low profile design of the DE275 minimizes the space required for installation.

Note: CRU recommends that the DE275 carrier not be used in DE75 frames, nor should DE75 carriers be used in the DE275 frame. While the DE275 and the DE75 are physically the same CRU does not intend for the product lines to be interchanged.

Package Contents

- 1 - DE275 carrier assembly
- 1 - DE275 frame assembly
- 1 - Key set
- 1 - Alignment tool
- 2 - 4-40 x 1/8" Flathead screws (carrier cover)
- 4 - 6-32 x 1/4" Flathead screws (drive mounting)
- 4 - M3 x 6mm Trusshead screws (frame mounting)

Receiving Frame Board

Factory-Installed Jumper (Pins 15 & 17) – Factory-installed jumper. DO NOT REMOVE!

Remote Activity LED (RLED) – These pins provide a remote LED device activity indicator (Pin 13=Cathode, Pin 14=Anode).

Frame Data Connectivity – For SATA operation the SATA data cable must be connected to the SAS/SATA Host 1 Connector. SATA hard drives do not support the SAS Host 2 Connector. SAS hard drives can use either SAS Host 1 Connector or SAS Host 2 Connector. The DE275 supports the SAS dual host feature for fail over protection.

Figure 1: Receiving Frame Board (rear view)

Frame Installation

For SATA operation connect a SATA data cable to the SATA/SAS host 1 connector.

For SAS operation connect a SATA/SAS data cable to either SATA/SAS Host 1 or SAS Host 2 connector.

For dual host capabilities connect SATA/SAS data cable to SATA/SAS Host 1 and SAS Host 2.

Connect SATA power or ATX power to the power connectors on the back of the DE275. The DE275 will support either ATX or SATA power.

Slide the frame into an available drive bay and secure the frame.

Drive Installation

1. Carefully insert the drive into the carrier. Slide the drive towards the Drive Carrier Board, so that the I/O connector on the drive mates with the connector on the Drive Carrier Board. Turn the drive/carrier assembly over.
2. Fasten the drive into place with the four provided #6-32 Phillips Under Cut Flat Hd. Screws. Some drives may require minor adjustment, to position the drive before securing into carrier with screws.
3. Install the provided drive cover. Insert the front end of the cover first and then slide the cover towards the rear of the carrier. Secure drive cover with the two provided #4-40 Phillips Under Cut Flat Hd. Screws.

Figure 3: Unit ID Select Switch Location

Unit ID Select Switch Settings

Note: The unit ID number display is for ID display purposes only.

The following table lists the unit ID select switch settings.

DISPLAY (HEX)	UNIT NUMBER (10)	DISPLAY (HEX)	UNIT NUMBER (10)
0	0	8	8
1	1	9	9
2	2	A	10
3	3	b	11
4	4	c	12
5	5	d	13
6	6	E	14
7	7	F	15

Table 1: Unit ID Hex Reference

NOTE: The lock on the Data Express serves as a power switch. It must be engaged (turned counterclockwise) for the Data Express to power up and function properly.

Limited Product Warranty

CRU-DataPort (CRU) warrants the Data Express DE275 to be free of significant defects in material and workmanship for a period of five years from the original date of purchase. CRU's warranty is nontransferable and is limited to the original purchaser.

Limitation of Liability

The warranties set forth in this agreement replace all other warranties. CRU expressly disclaims all other warranties, including but not limited to, the implied warranties of merchantability and fitness for a particular purpose and non-infringement of third-party rights with respect to the documentation and hardware. No CRU dealer, agent or employee is authorized to make any modification, extension, or addition to this warranty. In no event will CRU or its suppliers be liable for any costs of procurement of substitute products or services, lost profits, loss of information or data, computer malfunction, or any other special, indirect, consequential, or incidental damages arising in any way out of the sale of, use of, or inability to use any CRU product or service, even if CRU has been advised of the possibility of such damages. In no case shall CRU's liability exceed the actual money paid for the products at issue. CRU reserves the right to make modifications and additions to this product without notice or taking on additional liability.
