MINI DRIVE SHIPPING CASE INSTRUCTIONS

1. Place the drive enclosure into the Mini Drive Shipping Case.
2. Place the USB cable around the drive. Recesses can be found on either side of the drive to make room for the ends of the cable.
3. Close the case and slide the latch closed.
4. Finally, if you are transporting the case via post or courier, apply a shipping label to the flat area on the rear of the case.

Optional Tie-Wrap Lock

You can add a tie wrap through the handle of the case to secure it. Slide the latch closed and then insert the tie wrap through the gap in the latch, then tighten.
