

Protecting
Your Data™

Dell's Exclusive Supplier of Removable Drive Enclosures

For over 10 years, Dell has trusted CRU to supply its removable drive offerings for workstations, desktops, and laptops. Dell continues to trust in CRU to create and deliver innovative removable solutions. CRU is the sole supplier of removable drives to Dell, and for over 20 years, CRU drives have been the standard for government agencies and others who need to efficiently, safely, and securely transport data.

CHOOSE REMOVABLE DRIVES

Removable drives are the fastest and most cost-efficient way to transport volumes of data since shipping hard drives is still faster than delivering over the internet. Removable drives are also ideal for securing data since they're easy to take out of a computer and store in a safe location.
