

# DataPort DP27

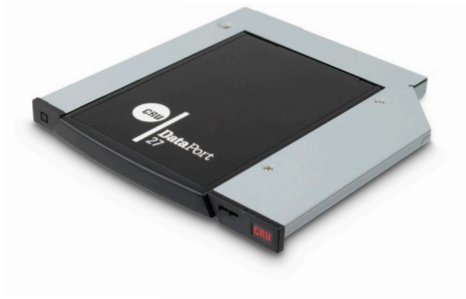

## Simple use, wide utility

CRU removable drives are installed in workstations, desktops, and laptops, providing fast and useful access to a drive for security, privacy, transport, ingestion, or backup applications. CRU is the exclusive supplier of CFI order ready removable drives to Dell, and is proud of our decade of collaboration and joint product development.

FEATURES	BENEFITS
<b>Rugged and reliable</b>	CRU's removable drives are all designed to the highest standards. The DataPort DP27 has an all-metal construction, and is warranted for heavy use – up to 50,000 drive insertions!
<b>Slimline design</b>	With the same dimensions as many optical drives, the DP27 fits into 9.5mm slimline optical bays (meeting the standard SFF-8552, rev 1.4 specifications) such as those found in small form factor desktops, laptops, and workstations.
<b>Drives and speeds</b>	Use any capacity 2.5" low profile (7mm height) SATA hard drives or SSDs. And with 6G SATA speeds, data transfer is fast and efficient.
<b>Lockable and secure</b>	The DP27 is available with a keylock release to secure the drive carrier and its data.
<b>Warranty</b>	The DP27 comes with a 5-year limited warranty, as well as free, US-based technical support for the lifetime of the product.

5.08" W x 5.04" L x 0.37" H  
129mm W x 128mm L x 9.5mm H  
Weight (no drive): 0.50 lbs. (0.23 kg)

**PART NUMBER DESCRIPTION**

8270-6406-8500	DP27 (keylock release, frame + carrier)
8270-6409-8500	DP27 (push release, frame + carrier)
8271-6409-8500	Carrier only

**Millions installed**

CRU's removable drives are the industry standard for transporting and securing large volumes of data. Used by government agencies and businesses around the world, our removables are incorporated into workstations, PCs, laptops and other computing devices. CRU is proud to be the exclusive supplier of CFI order ready removable drives to Dell.

**Optional keylock for additional security**

There are two different frames for the DP27: a version with a push button release, and a version that provides a lock and key. For the safety and security conscious, the key locked version adds peace of mind.

**Any computer you want**

Because the DP27 frame has the same dimensions as an optical disk drive, it can fit into nearly all workstations, desktops, and laptops. The DP27 combines the speed and reliability of an internal drive with the ease of use of an external drive.

**One of many removables for Dell**

In addition to the DP27 for optical bays, CRU offers removable drives for a variety of form factors. For workstations or desktops with 5.25" drive bays, the DataPort DP10 and Data Express DX115 are industry standards, and the DataPort DP25 for 3.5" drive bays is commonly used in workstations worldwide.
