

DataPort DP27

Any computer you want

The DP27 frame has the same dimensions as an optical disk drive, fitting into nearly all workstations, desktops, and many laptops. And with the DP27 Dock, you can directly attach your removable drive externally with a conventional USB connection.

FEATURES	BENEFITS
Rugged and reliable	CRU's removable drives are all designed to the highest standards. The DataPort DP27 has an all-metal construction, and is warranted for heavy use – up to 50,000 drive insertions!
Slimline design	With the same dimensions as many optical drives, the DP27 fits into 9.5mm slimline optical bays (meeting the standard SFF-8552, rev 1.4 specifications) such as those found in small form factor desktops, laptops, and workstations.
Drives and speeds	Use any capacity 2.5" low profile (7mm height) SATA hard drives or SSDs. And with 6G SATA speeds, data transfer is fast and efficient.
Lockable and secure	The DP27 is available with a keylock release to secure the drive carrier and its data.
Warranty	The DP27 comes with a 5-year limited warranty, as well as free, US-based technical support for the lifetime of the product.

5.08" W x 5.04" L x 0.37" H
 129mm W x 128mm L x 9.5mm H
 Weight (no drive): 0.50 lbs. (0.23 kg)

Millions installed

CRU's removable drives are the de facto industry standard for transporting and securing large volumes of data. Used by government agencies and businesses, our removables are incorporated into workstations, PCs, laptops, and other computing devices. CRU removables are also relied upon by Hollywood to deliver their movies to cinemas around the world. CRU is proud to be the exclusive supplier of factory-integrated removable drives to HP.

CRU PART #* DESCRIPTION

8271-6409-8500 DP27 carrier (universal)
FOR FLAT BEZELED COMPUTERS

Optional keylock for additional security

There are two different frames for the DP27: one with a push button release, and another with a lock and key release. For the safety and security conscious, the locked version adds peace of mind.

Ideal for HP laptops

The DP27 frame can be configured with alternate bezels to fit seamlessly into HP laptops, such as the HP ProBook 640 and 650. The DP27 combines the speed and reliability of an internal drive with the ease of an external drive. This makes it easy to secure sensitive data without locking up the entire device.

One of many removables for HP

In addition to the DP27 for optical bays, CRU offers removable drives for a variety of form factors. For workstations or desktops with 5.25" drive bays, the DataPort DP10 and Data Express DX115 are industry standards, and the DataPort DP25 for 3.5" drive bays is commonly used in workstations worldwide.
